+91 8709547795 23cs531kris@ug.cusat.ac.in [LinkedIn](#) [GitHub](#) [LeetCode](#) [Portfolio](#)

Kochi, Kerala

ACHIEVEMENTS

- NTSE Scholar — Awarded by Government of India for academic excellence
- INSPIRE Scholar — DST scholarship for top 1% science students
- Winner — Zyfer Hackathon, MES Asmabi College
- Winner — HackAthena Hackathon, Jyothi Engineering College
- PRMO Qualified (Pre-Regional Mathematical Olympiad)

EDUCATION

B.Tech in Computer Science and Engineering

Expected 2027

Cochin University of Science and Technology

CGPA: 8.98 / 10.0

Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, OOP

TECHNICAL SKILLS

Languages	JavaScript, Python
Frontend	HTML, CSS, React.js, Next.js, Tailwind CSS
Backend	Node.js, Express.js
Databases	MongoDB
Concepts	Data Structures & Algorithms, OOP, REST APIs, SDLC, Debugging
Tools	Git, GitHub, Postman

EXPERIENCE

AI Intern

Sep 2025 – Nov 2025

Infosys

- Developed and tested Python-based applications for image classification using structured workflows.
- Built data preprocessing and evaluation pipelines, improving model accuracy and performance.
- Debugged model and data issues, ensuring reliability and consistency in outputs.
- Documented development workflows and collaborated with team members using Git.

Web Development Intern

June 2025 – July 2025

VaultofCodes

- Developed backend APIs and integrated them with frontend applications using Node.js and Express.js.
- Collaborated in a team environment to design and implement scalable features.
- Debugged application issues and improved performance and reliability.
- Followed MVC architecture and software development best practices.

PROJECTS

YelpCamp — Full Stack Web Application

[Live Demo](#)

- Built a full-stack web application using Node.js, Express.js, MongoDB, and React.
- Designed and implemented RESTful APIs with authentication and data validation.
- Applied MVC architecture for modular, maintainable, and scalable code.
- Deployed and monitored application performance, improving responsiveness and stability.

CoastGuard AI — Distributed Surveillance System

[Live Demo](#)

[GitHub](#)

- Developed a data-driven application for anomaly detection using Python.
- Designed system architecture to process and analyze real-time data efficiently.
- Focused on problem-solving, optimization, and handling edge-case scenarios.
- Deployed using Streamlit and ensured usability through iterative improvements.
