EDUCATION

B.Tech in Computer Science and Engineering
Cochin University of Science and Technology

Expected May 2027
CGPA: 8.938/10.0

HONORS & ACHIEVEMENTS

- **Runner-Up (Rank 2), IET India Scholarship Award 2026 (Semi-Final):** Recognized for technical articulation, product-first mindset, and analytical engineering depth.
- **Hackathons: Winner**, Zyfer National Hackathon & HackAthena; **Semi-Finalist**, Google The Big Code 2026.
- **Competitive Programming: Codeforces Specialist** (Peak: 1422); solved 500+ problems demonstrating algorithmic efficiency and code optimization.
- **National Scholastic Honors:** Qualified **PRMO (Top 1% nationally)**, **NTSE Scholar**, and Government of India **INSPIRE Scholar**.

TECHNICAL SKILLS

Frontend Engineering: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, State Management
UI/UX & Architecture: Component-Driven Architecture, Micro-interactions, Design Systems, SSR/CSR, Web Performance
Backend & Data: REST APIs, Node.js, Express.js, PostgreSQL, MongoDB
Tools & Workflow: Git, GitHub, Postman, Vite, Chrome DevTools, Linux CLI
Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Computer Networks

EXPERIENCE

Frontend Engineering Intern

May 2026 – Present

Edu-Learning Spaze

- Engineered fluid, user-centric client interfaces for a Smart Textbook platform using **React**, **TypeScript**, and modern CSS.
- Designed an interactive Study Plan module with an intuitive drag-and-drop scheduling UI, dynamic progress tracking, and robust edge-case handling.
- Architected an onboarding tutorial walkthrough featuring accessible keyboard navigation, responsive layouts, and 60fps micro-animations.
- Established client-side API mocking patterns, unblocking parallel frontend iterations and accelerating release velocity across features.
- Resolved hydration and window-scope lifecycle mismatches during server-side rendering, ensuring seamless initial page loads and zero layout shifts.

Web Development Intern

Jun 2025 – Jul 2025

VaultofCodes

- Built modular UI views and integrated structured **REST APIs** in **Node.js/Express**, ensuring end-to-end data type consistency.
- Implemented robust form validation and defensive client-side error-handling states, preventing invalid submissions and minimizing UI friction.

AI Intern

Sep 2025 – Nov 2025

Infosys Springboard

- Developed Python processing pipelines for 50,000+ asset datasets, standardizing image aspect ratios and formats for web-ready consumption.
- Integrated automated test suites and defensive validation checkpoints to maintain clean data pipelines for downstream applications.

TECHNICAL PROJECTS

Smart Incentive Calculator

[Live Demo](#) | [Source Code](#)

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL

- Designed an enterprise-grade fintech dashboard offering clear separation of concern across distinct user permissions and administrative views.
- Built reactive, real-time formula recalculations on input change, eliminating latency and providing instant visual feedback on multi-tier commission models.
- Implemented accessible form controls, clean tabular data representations, and defensive error states for handling complex financial formulas.
- Structured a reusable, typed component library with **TypeScript** and **Next.js** App Router to ensure consistent design language across all screens.

SmartTour: AI Travel Planner

[Live Demo](#) | [Source Code](#)

Tech Stack: Next.js, React, TypeScript, Gemini API

- Created a high-polish, interactive itinerary planner with interactive maps, rich modal details, and dynamic budget visualization widgets.
- Handled complex asynchronous streaming and schema-validated LLM payloads, crafting defensive fallback skeleton loaders for latency masking.
- Implemented persistent client-side caching and offline storage mechanisms to deliver uninterrupted user experiences during network dropouts.
